Good Morning,

I would like to request the following archived CERCLIS file needed to complete a preliminary environmental site assessment for a proposed road improvement project for the Illinois Department of Transportation (IDOT). The only documents needed are releasable items related to any remediation activities including sampling results and if possible maps. If the site is closed than only the closure report would be necessary, if not than the most recent releasable quarterly or semi-annual or annual report would be necessary. Only the releasable documents that is in the Superfund Enterprise Management System (SEMS) are necessary. No legal documents are required. It is also understood that there may be a monetary commitment, this is also not a problem.
